In a restaurant, the tables are rectangular. Each table seats four people: two along each of the longer sides of the table (see diagram). Eight friends have booked two tables, X and Y . Rajid, Sue and Tan are three of these friends.

- (a) The eight friends will be divided into two groups of 4, one group for table X and one group for table Y .

Find the number of ways in which this can be done if Rajid and Sue must sit at the same table as each other and Tan must sit at the other table. [3]

.....

.....

.....

.....

.....

.....

.....

.....

When the friends arrive at the restaurant, Rajid and Sue now decide to sit at table X on the same side as each other. Tan decides that he does not mind at which table he sits.

- (b) Find the number of different seating arrangements for the 8 friends. [3]

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

As they leave the restaurant, the 8 friends stand in a line for a photograph.

- (c) Find the number of different arrangements if Rajid and Sue stand next to each other, but neither is at an end of the line. [4]

- 5** Raman and Sanjay are members of a quiz team which has 9 members in total. Two photographs of the quiz team are to be taken.

For the first photograph, the 9 members will stand in a line.

- (a)** How many different arrangements of the 9 members are possible in which Raman will be at the centre of the line? [1]

.....

.....

.....

.....

.....

- (b)** How many different arrangements of the 9 members are possible in which Raman and Sanjay are not next to each other? [3]

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

For the second photograph, the members will stand in two rows, with 5 in the back row and 4 in the front row.

- (c) In how many different ways can the 9 members be divided into a group of 5 and a group of 4? [2]

.....

.....

.....

.....

.....

.....

.....

.....

- (d) For a random division into a group of 5 and a group of 4, find the probability that Raman and Sanjay are in the same group as each other. [4]

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

- 6 A Social Club has 15 members, of whom 8 are men and 7 are women. The committee of the club consists of 5 of its members.

- (a) Find the number of different ways in which the committee can be formed from the 15 members if it must include more men than women. [4]

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

The 15 members are having their photograph taken. They stand in three rows, with 3 people in the front row, 5 people in the middle row and 7 people in the back row.

- (b) In how many different ways can the 15 members of the club be divided into a group of 3, a group of 5 and a group of 7? [3]

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

In one photograph Abel, Betty, Cally, Doug, Eve, Freya and Gino are the 7 members in the back row.

- (c) In how many different ways can these 7 members be arranged so that Abel and Betty are next to each other and Freya and Gino are not next to each other? [3]

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

- 6** Mr and Mrs Ahmed with their two children, and Mr and Mrs Baker with their three children, are visiting an activity centre together. They will divide into groups for some of the activities.

(a) In how many ways can the 9 people be divided into a group of 6 and a group of 3? [2]

.....

.....

.....

.....

.....

.....

.....

.....

5 of the 9 people are selected at random for a particular activity.

(b) Find the probability that this group of 5 people contains all 3 of the Baker children. [3]

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

All 9 people stand in a line.

- (c) Find the number of different arrangements in which Mr Ahmed is not standing next to Mr Baker. [3]

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

- (d) Find the number of different arrangements in which there is exactly one person between Mr Ahmed and Mr Baker. [3]

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

7 A group of 15 friends visit an adventure park. The group consists of four families.

- Mr and Mrs Kenny and their four children
- Mr and Mrs Lizo and their three children
- Mrs Martin and her child
- Mr and Mrs Nantes

The group travel to the park in three cars, one containing 6 people, one containing 5 people and one containing 4 people. The cars are driven by Mr Lizo, Mrs Martin and Mr Nantes respectively.

- (a) In how many different ways can the remaining 12 members of the group be divided between the three cars? [3]

.....

.....

.....

.....

.....

.....

.....

.....

.....

The group enter the park by walking through a gate one at a time.

- (b) In how many different orders can the 15 friends go through the gate if Mr Lizo goes first and each family stays together? [3]

.....

.....

.....

.....

.....

.....

.....

.....

.....

In the park, the group enter a competition which requires a team of 4 adults and 3 children.

- (c) In how many ways can the team be chosen from the group of 15 so that the 3 children are all from different families? [2]

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

- (d) In how many ways can the team be chosen so that at least one of Mr Kenny or Mr Lizo is included? [3]
